

Environmental Performance Data

*Criteria: FY2013

CO₂ emissions

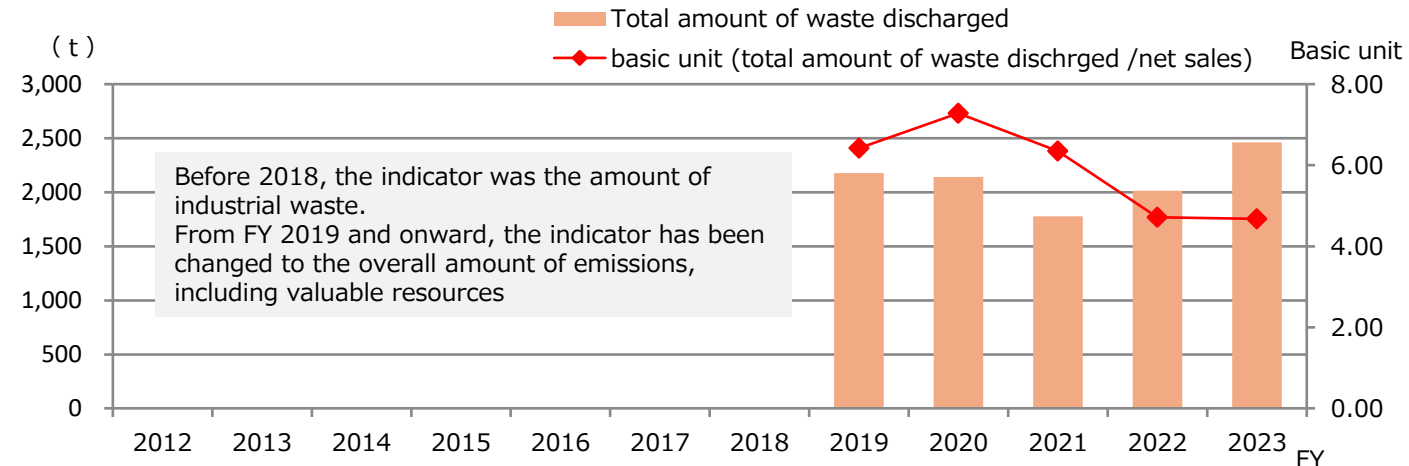

Target for FY2023: 63.9% reduction (basic unit) from FY2013

Results for FY2023: 56.5% reduction (basic unit) from FY2013

◆Target NOT achieved due to delay in the introduction of SF₆ gas substitution equipment (external factor), etc.

*Criteria: FY2019

Total amount of waste discharged

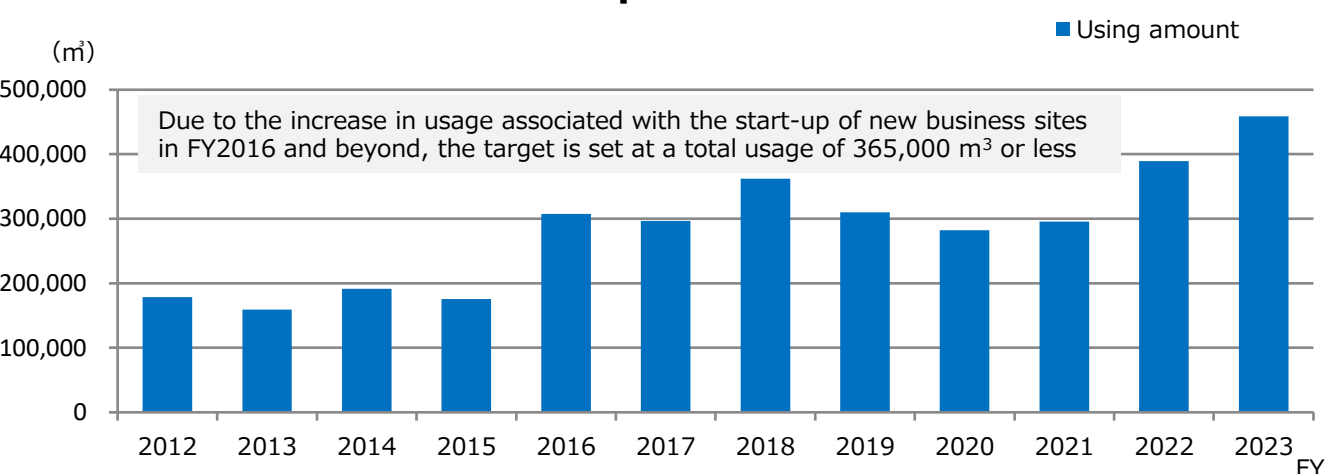

Target for FY2023: 6.9% reduction (basic unit) from FY2019

Results for FY2023: 27.1% reduction (basic unit) from FY2019

◆Target achieved by the reduction of emissions through the rationalization of production and the promotion of recycling

Water Resource Consumption

Target for FY2023: Consumption of 362,500 m³ or less

Results for FY2023: 458,872 m³

◆Target NOT achieved due to underground pipe breakage, water leakage, and increased water usage due to increased production
